

An Introduction to Work Related Upper Limb Disorders

“A course designed especially for Occupational Health Nurses and Advisors”

This 2 hour course has been specifically designed to increase the knowledge and confidence of OHN`s and OHA`s in their management of work related upper limb conditions.

Early intervention is key and we look at the important role of the OHN in early identification of symptoms to prevent disorders becoming chronic.

About the course:

- **WRULD`s Vs ULD`s?**
- **Possible causes of WRULD`s**
- **Introducing the top 5 ULD`s**
- **Assessment and management of WRULD`s**
- **Case study**

The advice you will be able to pass onto your employees will be invaluable.
